# METHOD, SYSTEM, AND COMPUTER PROGRAM PRODUCT FOR AUTOMATICALLY PERFORMING AN OPERATION IN RESPONSE TO INFORMATION

## ABSTRACT OF THE DISCLOSURE

In one embodiment, at least one information handling system receives an excerpt of information. In response to the excerpt, the information handling system performs at least one of the following operations: in an XML format, automatically storing the excerpt in a folder that is preselected by a first user, wherein the folder is accessible by one or more second users specified by the first user; and, in the XML format, automatically outputting the excerpt to one or more second users preselected by the first user.
